

# ADDACTIS® Pillar3

## ADDACTIS PILLAR<sup>3</sup>

The software dedicated to the generation of the **entire solo and group regulatory reports set**.

A **user friendly tool** to visualize and edit reports.

An **easy way to manage reports** production and follow-up.

The tool to **manage SII data** (source, traceability, comments, etc.).

## ADDACTIS® Pillar3

**Worldwide actuarial software. European Expertise. Local solutions.  
Big capacity & performance driven actuarial software.  
User friendly, SII compliant, IT integration.**

ADDACTIS® Pillar3 generates your whole range of Solvency II regulatory reports using XBRL and Microsoft Excel® technologies and covers the entire supply chain, from Solvency Capital Requirement of Pillar 1 (SCR, MCR, BE, Risk margin...) to electronic signature for all quantitative and qualitative reports to be transmitted to supervisory authorities.

Moreover ADDACTIS® Pillar3 has been structured to provide you with your own reporting templates and data checks.

ADDACTIS® Pillar3 is based on a dedicated database centralizing and archiving both regulatory and internal reports along with full audit trail.

The complete backup of reports, taxonomies and version specifications (Lobs, computations...) allows you to regenerate identical reports at any time.

In this single framework, you can carry out intra/inter reports consistency tests and see at any time your project's progress thanks to powerful dashboards.

The dedicated user and profile management feature allows controlling access to the system and organizing the reporting process between your departments. With the user friendly interface, you will not have to worry about XBRL's complexity. You can review the qualitative and quantitative reports previously sent to the regulator at any time.

ADDACTIS® Pillar3 enables easy data importation. In particular it provides a direct connection to ADDACTIS® Modeling, our modeling platform and to ADDACTIS® Workflow our data & process integration platform.

**SECURED INTRANET** with your own user's account

**FREE TRIAL** without commitment

**COMPREHENSIVE USERS GUIDE** for users' software

**SUPPORT** for all your actuarial and IT questions

**ANNUAL MAINTENANCE** including latest updates

**PARTICIPATION TO SOFTWARE USERS' CLUBS**, the opportunity to have a say on future developments of one's software
